

Your Home's Brahmasthan

found and explained

The centre of your floor plan, worked out from the outline you traced, with an AI reading of what sits at that exact spot.
Prepared for **Sample Home (floor plan)**

YOUR MAIN RESULT

Your Brahmasthan centre is 20.5 ft from the West wall and 20.4 ft from the South wall.

The Brahmasthan zone around it is about 14.1 ft × 14.1 ft — 200 sq ft, one-ninth of your 1,800 sq ft.
At the centre of your plan the AI sees: Staircase going up to the first floor, beside the passage

Inside this report

- p2** Your plan turned North-up, with the true-size zone
- p3** The 9-zone grid on your plan and the rooms in each zone
- p4** What sits at your centre, and how to check it yourself
- p5** Room-by-room directions compared with common guidance
- p6** Practical fixes for your centre — no demolition first
- p7** The 81-pada Vastu Purusha Mandala, turned to your North
- p8** Find it at home in 5 steps
- p9** Summary scorecard and next steps

How this was worked out

1 Your outline You traced the outer walls of your plan; North is taken from the side you picked.	2 The true centre We calculated the area-weighted centre of your traced outline, and scaled it with the area you entered.	3 AI reading An AI read your drawing at that marked point. It can be wrong, so page 4 shows how to check it.
--	---	--

Vastu Shastra is traditional guidance about space, light and order. This report explains what the tradition says about your home. It is not a prediction or a guarantee of any result, and it is not structural, legal or medical advice. Questions about your report? Email info@vastuiq.com — we reply within 48 hours.

Your Plan, North-Up

Your drawing turned so North is at the top, with the true-size zone

Your traced outline is shown in dark red over your drawing, turned so North is up (so the writing on your plan may appear sideways or upside down). The gold box is the true-size Brahmansthan zone; the orange dot is the exact centre.

Distance from the centre to the wall straight ahead

20.5 ft TO THE WEST WALL	27.3 ft TO THE EAST WALL	27.4 ft TO THE NORTH WALL	20.4 ft TO THE SOUTH WALL
-----------------------------	-----------------------------	------------------------------	------------------------------

Measured from the outer lines of your layout, the centre is 20.5 ft from the West edge and 20.4 ft from the South edge (layout 47.8 ft East–West × 47.8 ft North–South).

YOUR BRAHMASTHAN ZONE

About 14.1 ft (East–West) × 14.1 ft (North–South) = 200 sq ft, which is one-ninth of your 1,800 sq ft.

How we drew it: in the traditional 81-square Vastu grid, Brahma holds the central 9 squares — one-ninth of the area. We draw a box with the same proportions as your overall layout, sized to exactly one-ninth of your real floor area, and centred on the true centre. For a plain rectangle this is exactly the middle square of a 3 × 3 grid. For L, T and irregular homes it follows the real balance point of the floor instead of the middle of the outer rectangle.

Feet are worked out from the total area you entered (1,800 sq ft) and the outline you traced, so they are as accurate as those two inputs.

The 9 Zones on Your Plan

Your plan split into the nine directions, with the rooms the AI found in each

Your outer layout (47.8 ft × 47.8 ft) is split into a 3 × 3 grid, each cell about 15.9 ft × 15.9 ft. The area figure is the part of your actual floor inside each cell, so cut corners show as smaller numbers.

ZONE	AREA	BUILT	ROOMS THE AI FOUND	BEST SUITED FOR
NE North-East Ishanya	0 sq ft	0%	—	Pooja or meditation, study, windows and open space; keep it light and clean
E East Purva	163 sq ft	64%	—	Living room, main entrance, windows for morning light
SE South-East Agneya	254 sq ft	100%	Drawing Room	Kitchen, electrical panel, inverter
S South Dakshina	254 sq ft	100%	Kitchen	Bedrooms, heavier furniture, storage
SW South-West Nairutya	254 sq ft	100%	Bedroom	Master bedroom, heavy storage, wardrobes
W West Paschima	254 sq ft	100%	Lounge	Dining, children's room, study, overhead water tank
NW North-West Vayavya	254 sq ft	100%	Master Bed	Guest room, toilet, store room, parking
N North Uttara	151 sq ft	59%	—	Living room, entrance, cash cupboard, open space
Centre Brahmasthan	217 sq ft	85%	Staircase, Passage	Kept open, light and uncluttered

Zones less than 70% built: North-East (0%), East (64%), North (59%). These are your "cut" areas — see page 9 for what they mean.

Room positions are the AI's reading of the labels on your drawing. Each room is placed in the zone where its middle falls; large rooms often spread across two zones.

Centre status: Serious

What this means: Vastu prefers another place for this, but it is common in real homes. Simple steps on page 6 usually help — no demolition needed.

Close-up of your zone (gold box) and exact centre (orange dot).

AT YOUR EXACT CENTRE POINT

Staircase going up to the first floor, beside the passage

ALSO INSIDE THE ZONE BOX

The zone also takes in part of the passage and the kitchen wall.

HOW WE CLASSIFIED IT

Category: Staircase / lift. Status: Serious.

The category came from the AI's structured reading of your plan.

HOW SURE THE AI IS

Medium — mostly clear, but some parts were hard to read.

The AI was given your exact centre point and zone size, and asked what is at that spot.

CHECK IT YOURSELF

- Look at the gold box on page 2. Which room labels on your drawing fall inside it?
- Does the orange dot fall inside the room the AI names? If not, trust your own reading.
- At home, mark the spot using page 8 and look at what is really there.
- If the AI got it wrong, write to us — we will look at it and reply.

WHAT THE AI NOTED ABOUT YOUR PLAN

Clean architect-style drawing with readable room labels.

AI readings can be wrong, especially on hand-drawn or low-resolution plans. The centre position itself comes from your traced outline and area, not from the AI. Questions about your report? Email info@vastuiq.com — we reply within 48 hours.

Room-by-Room Directions

Where each room sits on your plan, compared with commonly used guidance

ROOM (AS READ BY AI)	ZONE ON YOUR PLAN	COMMONLY SUGGESTED	STATUS
Bedroom Bedroom	South-West	South-West, South, West	Good
Lounge Living / hall	West	North, East, North-East, North-West, Centre	Neutral
Master Bed Bedroom	North-West	South-West	Watch
Kitchen Kitchen	South	South-East	Neutral
Staircase Staircase / lift	Centre	South, West, South-West	Watch
Passage Passage / lobby	Centre	Any	Good
Drawing Room Living / hall	South-East	North, East, North-East, North-West, Centre	Neutral

2 good · 3 neutral · 2 watch, out of 7 rooms read from your plan.

Good = in a commonly suggested zone. Neutral = acceptable in most guidance. Watch = most guidance suggests a different zone; see the zone notes on page 3. "Watch" is a suggestion, not a defect.

Quick reference — what each zone suits

North-West Guest room, toilet, store room, parking	North Living room, entrance, cash cupboard, open space	North-East Pooja or meditation, study, windows and open space; keep it light and clean
West Dining, children's room, study, overhead water tank	Centre Kept open, light and uncluttered	East Living room, main entrance, windows for morning light
South-West Master bedroom, heavy storage, wardrobes	South Bedrooms, heavier furniture, storage	South-East Kitchen, electrical panel, inverter

The "commonly suggested" column follows widely used modern Vastu guidance. Texts and consultants differ, and real homes rarely match every suggestion.

AT YOUR EXACT CENTRE POINT

Staircase going up to the first floor, beside the passage — Centre status: Serious

What this means: Vastu prefers another place for this, but it is common in real homes. Simple steps on page 6 usually help — no demolition needed.

Start here — simple steps

- Keep the space under the stairs clear — not a store for junk
- Light the staircase well
- Keep the landing and nearby floor uncluttered

For every home

- Keep the zone box clear of heavy furniture and stored items
- Give the centre good light — daylight if possible, a lamp if not
- Keep the floor at the centre clean and easy to walk across

Only if you are renovating or building

- In a new design, stairs are usually placed in the South, West or South-West
- Do not alter an existing staircase without a structural engineer

POPULAR MODERN REMEDIES (NOT FROM THE CLASSICAL TEXTS)

Many people also use the items below. They come from present-day practice, not from the classical texts, and there is no evidence that they change anything. Use them only if they feel right to you.

- A Brahma yantra or Sri Yantra placed at the centre
- A crystal, copper or brass pyramid at the centre
- A bowl of sea salt in a bathroom, changed weekly
- Vastu strips or metal helixes on a floor or wall

WHAT NOT TO WORRY ABOUT

- In a flat you cannot have an open courtyard — keeping the centre clear and bright is enough.
- A doorway, an inside wall line or a light table at the centre is minor.
- Do not break walls, pillars or plumbing for Vastu. Safety and structure come first.
- Small measuring differences (a foot or so) do not change the guidance.

Never break walls, pillars, beams, stairs or plumbing for Vastu without a structural engineer. For bigger decisions, a local Vastu consultant who can visit the home is worth it.

Vastu Purusha Mandala — 81 Padas

The traditional 9 × 9 grid, turned to match the North on your drawing

The 81-pada (9 × 9) grid is the traditional Vastu Purusha Mandala used for homes. Brahma holds the central 9 padas — your Brahmasthan. Around Brahma, four deities hold 6 padas each, eight hold 2 padas each in the corners of the middle ring, and 32 deities hold one pada each around the edge.

This grid is turned to match your drawing: North is on the right side of the drawing. Lay it over your plan sheet the same way round.

Brahma (centre, 9 padas)	Your Brahmasthan — kept open and light.
Aryama (East), Vivasvan (South), Mitra (West), Prithvidhara (North)	The four deities around Brahma, 6 padas each.
Corner pairs	NE Apa · Apavatsa, SE Savitra · Savitri, SW Indra · Jaya, NW Rudra · Rajayakshma (2 padas each).
Corners of the edge	NE Isha (Shikhi), SE Agni, SW Pitri (Nirriti), NW Roga (Vayu).
Middle of each edge	East Surya, South Yama, West Varuna, North Soma.

Layout: traditional Vastu Purusha Mandala (81 padas), following the order of deities given in texts such as the Mayamata and the Brihat Samhita. Names and spellings vary between texts.

Find It at Home in 5 Steps

Use a measuring tape and your own numbers to mark the spot

VastulQ

Vastu • Astrology • Numerology

You will need: a measuring tape (a laser measure is easier), a pencil or masking tape, and a phone compass.

1

Check North

Stand inside with your phone compass and check that North matches the side you picked on your drawing (Right side of the drawing).

2

Start at the West wall

Go to the inside face of the wall to the West of the centre. Measure about 20.5 ft straight towards the East and make a small mark.

3

Measure from the South wall

From the wall to the South of the centre, measure about 20.4 ft straight towards the North. Where the two lines meet is the centre.

4

Cross-check

From the spot, the wall straight ahead should be about 27.3 ft to the East and 27.4 ft to the North. If both match within a foot, you have the right spot.

5

Mark the zone

Mark a box about 14.1 ft × 14.1 ft around the spot. This is your Brahmasthan zone (200 sq ft).

Your measuring lines: West and South distances in orange, the zone box in gold.

If inside walls are in the way, measure along a corridor or through a doorway and transfer the marks. Small differences of a foot or so are normal — wall thickness and rounding both add up.

What to look for at the spot

- Is the spot open floor, or is there a wall, pillar, staircase, toilet or heavy cupboard on it?
- Does daylight reach it, or is it the darkest part of the home?
- Is it a walkway that people pass through, or a place where things pile up?
- Is there a beam, water tank or heavy fitting directly above it?
- What is inside the zone box around it — note anything heavy or closed-in.

Write down what you find

At the exact spot

Inside the zone box

Light during the day

Things to move or clear

Your scorecard

What sits at the centre	Staircase going up to the first floor, beside the passage Centre status: Serious
Brahmasthan zone	About 14.1 ft (East–West) × 14.1 ft (North–South) = 200 sq ft, which is one–ninth of your 1,800 sq ft.
Shape and completeness	L–shape; cut or partly empty: North–East (0%), East (64%), North (59%)
Rooms in commonly suggested zones	2 good · 3 neutral · 2 watch, out of 7 rooms read from your plan.
How clear your plan was to the AI	Medium — mostly clear, but some parts were hard to read.

NORTH–EAST CORNER CUT

The North–East is the corner Vastu most wants complete, light and open. A cut here is the one most consultants mention first. It is very common in flats and does not mean anything bad will happen. Keep what remains of the North–East clean, bright and free of heavy furniture.

Your top three actions

- 1 Keep the space under the stairs clear — not a store for junk
- 2 Mark your centre at home using page 8 and take a photo
- 3 Clear the zone box of heavy and stored items
