01 · AT A GLANCE

What your report says

Your home scores **84 out of 100**, which puts it in the **Strong** band. Its strongest placements are Master Bedroom (South-West), Pooja Room / Mandir (North-East) and Living Room / Hall (North). We found 1 placement worth addressing; the most important are listed below.

0 PRIORITY	1 NEEDS ATTENTION	2 GOOD	9 STRONG
----------------------	-----------------------------	------------------	--------------------

Rooms and the main entrance, by score: Strong 80+, Good 60–79, Needs attention 40–59, Priority below 40 (a room in the centre counts as Priority).

Your top fix

1

Washroom 2 South-East · 55/100

Vastu recommends the North-West or West for this. Keep the door closed and the toilet lid down; keep the room dry and well ventilated.

How we read your home

Eight zones and the centre

Your property is read from its centre in eight directions of 45° plus the centre (Brahmasthan), the layout of the Vastu Purusha Mandala.

Room by room

Each room scores 0–100 for the direction it sits in, from direction tables based on Brihat Samhita and Manasara; key rooms carry more weight.

One serious defect counts

A major defect, such as a toilet in the North-East, caps the score at 59 so it is never hidden by a good average.

Facing is explained, not scored

Vastu judges a building by its entrance and room placement. Facing, shape and nearby water are covered as notes.

02 · YOUR DIRECTION MAP

Where every room sits

The map shows your home from above with North at the top, as seen from its centre. Each room is coloured by its own score; a red outline marks a major defect.

Main entrance: East, 90/100. North, North-East and East are the preferred entrances; the South-West is the one most sources warn against. Where the door sits along the wall also matters. Best spot: towards the North-East end of the East wall; check where yours is.

04 · YOUR TOP FIXES

What to do first

Most important first. Remedies are traditional corrections: they do not change a room's direction, so they do not change the score. Only moving a room, or using it differently, does.

1. Washroom 2 South-East

NEEDS ATTENTION **55**/100

VASTU SAYS

Vastu recommends the North-West or West for this room. The South-East is the fire zone (Agni), traditionally the kitchen's place.

BASIS

Widely followed Vastu practice

WHAT TO DO

NO COST

Keep the door closed and the toilet lid down; keep the room dry and well ventilated.

NO COST

Keep the room spotless; clutter and damp are what traditional guidance most warns against here.

LOW COST

Place a small bowl of sea salt on a shelf and replace it monthly — a common traditional remedy.

TO RAISE THE SCORE

Moving this room, or swapping its use with a room in the North-West or West.

05 · ABOUT THIS REPORT

How it was scored

Room scores

Each room scores 0–100 for the direction you entered, from VastuIQ's direction tables based on classical texts (*Brihat Samhita* ch. 53, *Manasara*) and, for rooms the texts do not discuss, agreed modern practice.

Overall score

Weighted average of the rooms and the main entrance; a major defect caps it at 59. Facing, shape and water are not scored.
